Zitzi Flipper Pro
Hi-low Indoor chassis

Tilt in space

Unique for Zitzi Flipper PRO is its “tilt in space” feature, allowing the seat to be tilted without compromising the balance and stability between the seat and underframe. This way the center of gravity is only minimally altered as opposed to when using a conventional tilt.

Manual or electric

There are two options to choose between for the lift feature. The electric motor is suitable for lifting larger weight effortlessly while the manual hydraulic lift is a hassle-free solution that doesn't require access to an electrical outlet for charging.

Practical wheels

The chassis is equipped with 125 mm wheels for easy rolling over carpet edges, thresholds and other obstacles. One of the wheels has directional lock.

Electric tilt

Flipper Pro with electrical functions can also be equipped with electrical tilt for an easier handling and less physical strain on assistants and parents.

Lift- and pushbar
Small and handy

Tilt in space
Reduces the risk of tipping and will not move the center of gravity

Electric tilt (optional)
For an easier handling and less physical strain

Zitzi Flipper Pro
Manual or electric

Height adjustment
In order to easily switch between work and play mode

Chassis
Steady construction with small dimensions

Wheels
Equipped with 125 mm wheels for easy rolling

Pedal
For easier adjustment of the height

Directional lock

** The measure below shows the chassis height and depending on the seat system you choose these dimensions will change*

Flipper Pro Quickies

Unique for Zitzi Flipper PRO is its tilt in space feature, allowing the seat to be tilted without compromising the balance and stability between the seat and underframe.

Sizes	3 st	Height adjustment	Yes
Editions	6 st	Wheels, standard	125 mm
Max load weight	75 kg	Min seat height	21 cm*
Tilt	30°	Max seat height	60 cm*
