disposable curtain system

Olympian disposable curtain system

Application

Opal Disposable curtains are the quick, efficient and hygienic alternative to traditional cubicle curtains. Designed to fit the vast majority of existing tracks, this robust product is easy to fit, easy to change and easy to pull round whilst offering higher privacy levels than most conventional curtains.

The curtains are extremely resilient and can remain hanging for a year or more, however, we would recommend that each hospital/site carries out its own assessment to set the frequency at which the curtains should be changed in different areas.

Opal Disposables are now installed in various sites throughout the UK and have, along with other infection control procedures, significantly reduced healthcare-associated infections (HAI's).

Cost Comparison

Opal Disposable curtains provide a cost effective solution to the management of hospital curtains.

- No curtain laundry costs
- No capital outlay for curtains
- No disruption to ward areas during changing
- Next Day Delivery
- Time saving on changeovers

Fire Retardant

Opal Disposable curtains comply with the same fire retardancy standards as conventional curtains, BS5867 Part 2 Type C. We rigorously test each batch supplied and copies of test certificates can be found at www.disposablecurtains.net.

Colours

Opal disposable curtains come in a range of standard colours and we have introduced a patterned range for those looking for a less clinical appearance whilst still maintaining all of the benefits associated with disposable curtains.

Installation

Opal disposable curtains are available with three different hook options which will fit existing tracks avoiding the need for unnecessary and expensive track alterations.

Hanging Opal disposable curtains could not be simpler and in comparison to conventional fabric curtains this can be carried out by a single person within a few minutes.

Recycling

In line with our ISO 14001 UKAS accreditation we are able to offer a number of recycling schemes suitable to the organisation's needs.

Your questions answered...

Q: How often do the curtains need to be changed?

The curtains are durable and can stay hanging for a year or more, however we would recommend that each hospital carries out its own assessment to set the frequency.

Each curtain has a self audit label so that you can easily see when it was last changed and can be included within existing infection control procedures.

Q: Does the fabric support bacterial growth?

No, the curtains are manufactured from a durable, disposable and completely recyclable polypropylene fabric which inhibits bacteria growth.

Q: Do disposable curtains offer the same privacy as conventional curtains?

Privacy for patients is actually enhanced using disposable curtains when compared to most conventional fabrics.

Q: What colours are available?

The curtains are available from stock in the following colours:

- Patterned
- Pacific Blue
- Sky Blue
- Mint Green
- Sand

Bespoke colours are also available, subject to quantities.

Q: Are the curtains available in varying width?

Sizes of curtains are available:

- Medium - Up to 3m track length.
- Large - Up to 6m track length.

Q: How are the curtains labelled?

Details of the date that the curtains have been fitted, the fire retardancy and the re-order code are clearly visible to allow simple auditing procedures to be applied.

Q: Are the curtains made from environmentally friendly fabric?

Yes, Opal disposable curtains are made from 100% polypropylene which has one of the lowest environmental impacts of any material, synthetic or traditional.

Q: How do we dispose of the curtains?

We can recycle ALL curtains including those classified as clinical waste.*
