

Bespoke Bed Specialist

CENTRO
BED

ARCTIC INDEPENDENT BED

The Arctic Independent Bed is a variation of our Baltic Bed, a multi-functional system that can accommodate even the most complex needs. The frame of the Arctic Is made up of different sections, making it possible for the client to sit up and turn left or right whilst in the seated position. It has the same features as the Baltic; left and right turning, head raise and knee break, Trendelenburg, reverse Trendelenburg and high/low action, but it also has individual leg movements and sit up/turn.

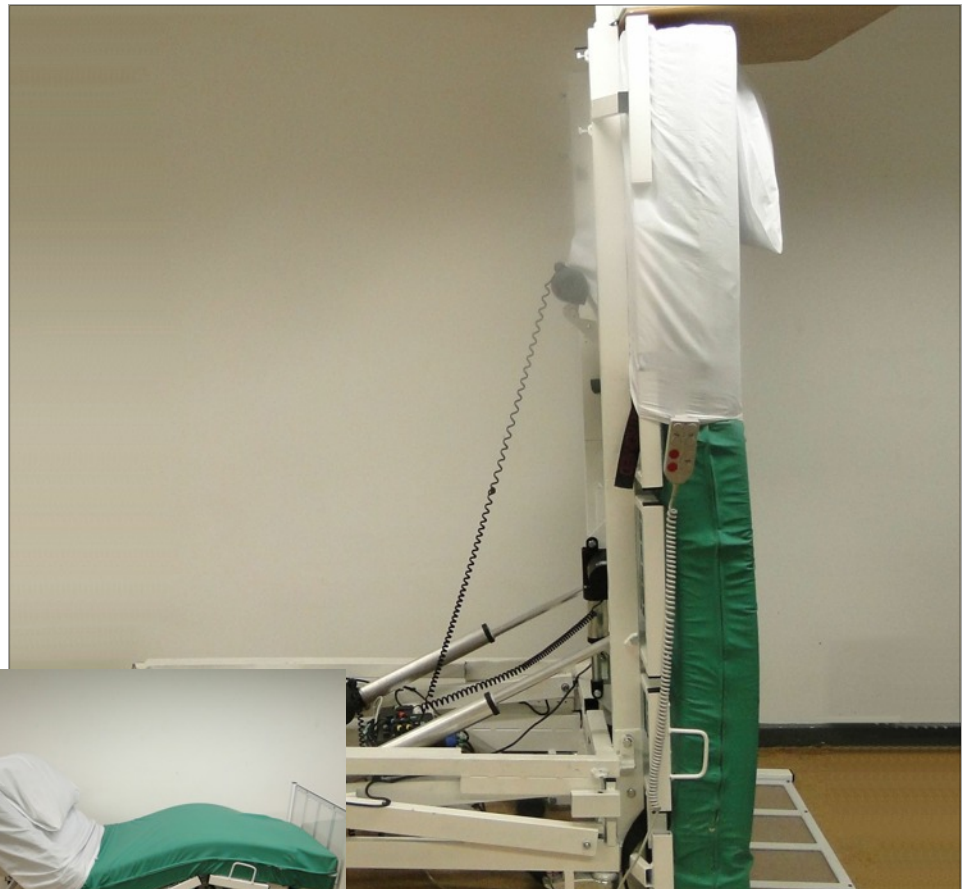

- Fully profiling
- Various Colours
- Bespoke
- Turning Action
- Possum Compatible

'The next generation of comfort'

IONIAN STAND UP BED

The Centrobed Ionian bed moves from horizontal to vertical and has been developed for use by individuals unable to bend when getting into or out of bed, therefore enabling greater independence. All our beds are bespoke and therefore can be tailored to not only meet the needs but also the physical measurements of the individual. This bed is also available with a high/low or fully profiling action.

Weight limit 25 stone, Bariatric version available up to 60 stone.

- Virtually silent action
- Comfortable speed movements
- Fully Profiling
- High / Low
- Increases independence

BALTIC TURNING BED

This Baltic bed is a multi-functional bed with head raise, knee break, high/low, Trendelenburg and reverse Trendelenburg and left and right turning. This bed is ideal for use in the community to enable independence and assist in turning and pressure relief. It can also be used for moving and handling.

Weight limit 25 stone, bariatric version available up to 50/60 stone.
Available in widths from 3' to 4' 6".

- Assisting with pressure relief
- Various Colours
- 6 simple functions
- Turning Action
- Ideal for MD_Hug action

TIMOR R CHAIR BED

The Timor R has a unique seat action which takes you effortlessly from laying to sitting to standing and is an alternative to hoisting or sleeping in a chair thus assisting independence.

Available widths 3' up to 4' 6" wide.

Weight limit 25 stone, bariatric version available up to 60 stone.

- Reduces the risk of injury to carers
- Available in various widths and sizes
- Bariatric Version available

*Timor Nurser

TIMOR NURSER

The Timor Nurser works in the same way but also offers a high/low action from the horizontal bed position.

PROFILING & MULTI ACTION BEDS

JUPITER

The Jupiter is a fully profiling bed with high/low, Trendelenburg and Reverse Trendelenburg.

Available from 2' 6" to 5' wide, weight limit 25 stone, bariatric version available up to 60 stone.

JAVA

For the more mobile client, the Java has all the features of the Jupiter but without the knee break.

ANTARCTIC

The Antarctic bed is a 4 section profiling bed. With its wooden head and foot boards and side rails this bed allows patients to sustain full comfort with its head tilt and knee break.

MEDWAY

The Medway system has a luxurious fully padded upholstered surround. This bed is high/low and fully profiling.

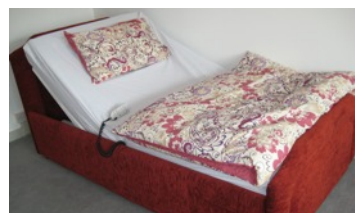

Available in a single (2'3" to 3'6"), a double (4' to 6'6")
Or as a dual system (4'6" to 6'6").
Weight limit 18 stone, upgrade available to 25-35 stone.
On the dual system you can choose to upgrade one system only.

THAMES

The Thames bed is available as fully profiling, turning and high/low options. The padded surround can be made in the fabric of your choice, with a range of designs available.

Width from 3' to 6', weight limit 60 stone.

BANDA

The Banda is a simple high/low column platform that is an affordable alternative for children as well as adults.

MADE IN BRITAIN

BARIATRIC PRODUCTS

A considerable amount of research and development has been invested in our Bariatric range of products. Making our beds unique for the client, Considerations need to be made for the Bariatric client and the carer. What happens when a carer is ill? With this in mind a range of beds have been designed to cater for this increasing market now available for community use. Products to accelerate hospital discharge, re-distribute pressure helping to prevent pressure sores. All our beds have locking castors and silent actuator movement. With a variety of widths and lengths. Centrobed have the answer to your Bariatric problems.

A Bariatric bed takes away the strain involved when caring for larger clients. The need for care in the community is paramount, from profiling to turning, your requirements can be catered for.

PAEDIATRIC BEDS & COTS

BALI THEMED BED

All children want a bed that is fun! The Bali will support all their needs and still won't look any different from a conventional bed. The Bali is a fully profiling and high/low bed. Choose your theme and the frame will be colour coordinated. We currently have a wide selection of different themes or can choose your own theme of your choice.

SAVU COT / BED

The Savu is a paediatric bed / cot that is both attractive and versatile. Movements are turning, profiling, hi/low along with the sturdy beech wooden frame this makes a bed that is both aesthetically pleasing and safe. One side has a clear panel that allows the child to look around, whilst the other side folds down for nursing and care, keeping the child safe yet easily accessible.

The bed has been designed for safety with NO GAPS. Choose your own colour and theme from our wide range.

BAFFIN BED

New exciting paediatric bed coming soon!

PAEDIATRIC BEDS & COTS

SCOTIA COT

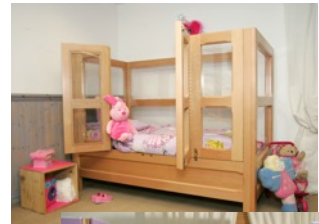

The Scotia cot with its high/low and head-up function will compliment the traditional nursery environment as well as providing the functionality needed for care. This cot is made from tulip wood, with a hand painted finish and comes complete with a mattress. A removable clear anti-entrapment panel can be easily fitted to the outside of the cot. Additional nursery furniture is available to match this cot.

FLORES COT

The Flores Cot bed has a high sided wooden surround with an electrically operated profiling bed frame. This specialist piece of equipment has been created to give a child a safe environment.

It can be fitted with bumpers all around to minimize the risk of injury or harm to the child. The Flores will also allow the child visual reassurance as macrolon windows have been incorporated replacing the traditional bars. The cot has access for a mobile hoist if required.

BISCAY COT

Hand crafted and made in England the Biscay cot falls in size and price between the Flores and Scotia. The solid back panel can either be padded or themed from a choice of a selection of pictures, or to personalise your Biscay you can provide the required artwork. The themed panels can easily be changed in the future. At either end there are clear toughened windows and to the front 2 full size doors with toughened clear windows that open, giving easy access for carers and a hoist. The bed base is static with the option of fully profiling and high/low.

MATTRESS VARIATORS

Centrobed's Mattress Variators are the ideal solution to lifting and supporting individuals thereby assisting in maintaining independence. Easily fitted and versatile.

MATTRESS VARIATORS

The Mattress Variator is fully portable air operated system that lies flat when deflated and lifts to 90° on inflation.

Weight limits: from 25 stone (158 kilos) single to 40 stone (254 kilos) double, . and kingsize.

PILLOW LIFTERS

Our pillow lifters are lightweight portable products designed to help individuals to sit up and then remain seated in bed. They can be used on the top of the mattress of any sized bed, whether at home or on holiday.

ULTIMATE

The Ultimate is actuator driven, requires no fittings and enables you to position yourself comfortably by use of the button handset.

Specifications: 2'2"

Weight limit: from 20 stone (95 kilos) through to 25 stone (158 kilos). Also available in additional widths and for heavy duty use.

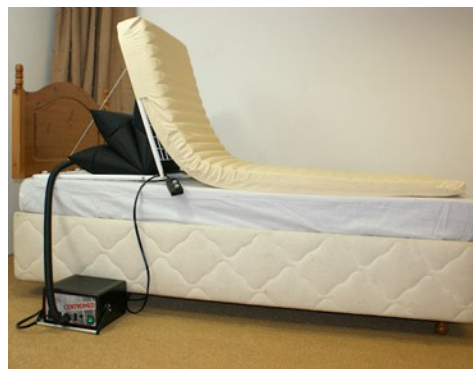

CASPIAN

The Caspian is a stable air operated system that can be used either under or on top of a mattress and allows you to position yourself comfortably by use of an air operated handset up to a maximum angle of 90°.

Specifications: 2'2"

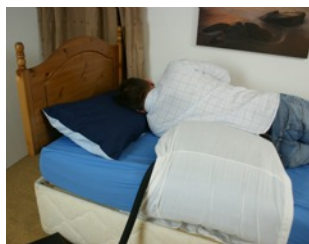

Weight limit: 20 stone (upper body)

TASMAN HANDI TURNER

The affordable way to independent turning, the portable Tasman Handi Turner allows clients to turn effortlessly one way. It is ideal for carers helping to assist with personal hygiene and applying dressings. The Tasman Handi Turner is concealed and practical, fitting and tucking in like a normal sheet.

Specifications: Dimension 10" x 9" x 6",
Weight limit 15 stone.

LEG LIFTERS

CORAL LEG LIFTER 3

For people who experience problems raising their legs for transfer into bed. It is height adjustable and can fold flat when not in use. The LL/3 will fit to a divan bed or a chair.

CORAL LEG LIFTER 4

The LL/4 hangs on the side of the bed using 2 brackets that are attached on the back of the frame. This is compatible with a metal frame bed.

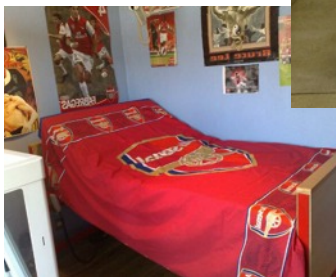

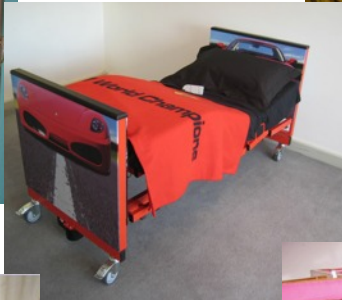

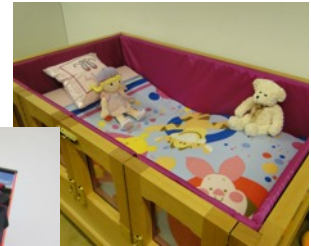

ARAL LEG LIFTER

The Aral Universal Electric Leg Lifter combines Centrobed's latest technology with a competitive price. Free standing or hanging on a bed Centrobed's Aral Leg Lifter creates greater independence and comfort. This multi-function system can be fitted to most bed types.

BESPOKE BEDS

Everyone is unique and here at Centrobed we will endeavour to meet your individual needs. As all our beds are manufactured on site, we are able to produce a bed to your exact specifications, whether it be shorter, wider or longer. Our fully trained representative can either visit your home or a local Disabled Living Centre for an assessment to ensure that the finished item is a bed that will meet all your requirements.

SEQUENTIAL COMPRESSION THERAPY

Sequential Compression Therapy units - a treatment system utilising multi-chambered garments which sequentially inflate, creating a peristaltic massaging effect, facilitating movement and drainage of built up fluids and stimulating blood flow to tissues.

Sequential compression therapy recreates exercise and manual massage. The garments fit to either arm or leg then the air is compressed on the limb to move excess fluid. Light weight, easy to use, comfortable and portable. There are several different cycle speeds and can be pressure adjustable.

(Depending on which Sequential pump is used)
