

**SMALL FOOTPRINT.
BIG IMPACT.**

MAXIMUM INDEPENDENCE WITH F3 CORPUS.

Accessibility, stability and comfort.

In terms of size, the F3 is the "little brother" in our family of front-wheel drive power wheelchairs. Its size and agility let you move quickly in and out of tight spaces like busy city streets and crowded shopping centres... or even compact apartments. The platform has a lower, repositioned center of gravity, which greatly improves stability when

driving up and down ramps or inclines. The F3 provides an exceptionally comfortable ride, saving your energy to navigate the obstacles of life.

The Corpus® Seating System comes as standard with all the ergonomic and technological features that have made it the leader in seating and positioning. The gently arced legrest, the open

armrest design and the UniTrack support system are just a few of the practical features combined into a sleek and stylish package that neatly follows the contours of the body.

There's no need to compromise comfort by choosing a smaller chair - the F3 is proof of that.

FEATURES

Compact accessibility.

It's asking a lot of a wheelchair to be smooth and manoeuvrable indoors and yet strong and easily controlled outdoors. However, the F3, with its low center of gravity and effective motors, does exactly that - giving you precise steering and driving power in both situations - even at low speeds. A compact and safe wheelchair that makes it easier to be active.

Comfort Ride.™

A finely tuned power base, with fully independent suspension on all 4 wheels, provides a higher level of comfort, indoors and outdoors. Saving your energy for the important things in life.

BENEFITS

More energy left for functional activities.

Driving a powered wheelchair requires a stable body position. The Corpus seating system is designed to cope with the lack of stability that one might feel.

Driving on uneven surfaces may compromise this stable body position because it elicits more lateral forces. The four-wheel independent

suspension system reduces these lateral forces, resulting in better stability in the seating position and, in general, better motor control.

The F3 chassis and the Corpus seating system work in synergy with each other. The chair filters out the shocks resulting from driving on an uneven surface. The core of the chassis and the

seat are transferring much less of this uncomfortable sensory input and help to reduce spasticity. Reduction of spasticity and compensation movements help to reduce fatigue and result in more energy left for functional activities and participation in daily life.

ACCESSORIES

Cushions

ROHO optional skin protection and positioning cushions:

- » Quadtro Select
- » Contour Select
- » Hybrid Elite
- » Ergo Air

Extra support

In various shapes and sizes, with customizable link hardware for easy positioning:

- » Head rests
- » Lateral supports
- » Thigh supports
- » Calf supports
- » Hip support
- » Amp. support

Tables in different shapes

- » Swingaway
- » Angle adjustable
- » Side mounted panel
- » Center mounted panel
- » Small table

Holders and baggage

Somewhere to put the things you need with you:

- » Phone & Tablet holders
- » Self-levelling cup holder
- » Armrest pouch
- » Medical necessities bag
- » Crutch holder
- » Oxygen holder
- » Essentials carrier

Corpus® Seating System.

A big plus with the Corpus seat is its outstanding bio-mechanical backrest movement. Providing superb shear reduction and ensuring a correct position change so your body can relax properly.

AP seat tilt.

The tilt and recline features have been complemented by the AP tilt function which helps you with transfers, contributes to increased functional reach and enables you to get closer to a table or workspace.

Seat elevator.

Utilizes 3 points of contact and moves the center of gravity slightly rearward as it elevates to maintain an unimaginable level of stability even at full elevation. This allows you to get closer to tasks while providing faster and higher elevation.

Comfort ride.™

A higher level of comfort, indoor and outdoor. Saving your energy for the important things in life.

Body supports in different sizes.

Brand new Permobil Original head and lateral support. Strong, yet lightweight solutions. Precise pad positioning with new modular link hardware.

Get the ultimate grip.

Choose from a variety of joystick grips. From a tennisball to specially formed handles, in different shapes and sizes.

Low seat height.

The relatively low seat height and anterior tilt function are practical in your everyday life.

Top speed is 10 km/h.

Personalize the chair with your favourite color.

Tires comes in black and you can choose between air-filled or solid.

No anti-tippers needed. Anti-tippers are not normally needed if you weigh less than 100 kg and choose the 8 km/h top speed option.

Flip-up foot plates for easier transfers.

SPECIFICATIONS

| | |
|--|-------------------------------|
| Chassis excl./incl. anti-tippers | 915/1015 mm |
| Length incl. seat | 1140 mm |
| Chassis width | 610 mm |
| Width incl. seat | 610–790 mm |
| Height | 970–1170 mm |
| Min. transport length (excl. anti-tippers) | 790 mm |
| Min. transport length (incl. anti-tippers) | 890 mm |
| Min. transport height | 825 mm |
| Seat height | 450 mm |
| Seat height with electric seat elevator | 450–750 mm |
| Weight incl. batteries 60/73 AH | 175/184 kg |
| Weight of batteries 60/73 AH | 2x19 kg/2x23 kg |
| Max. user weight | 150 kg |
| Seat width | 420–570 mm (by 50 mm) |
| Seat depth | 370–570 mm (by 25 mm) |
| Backrest width | 360/410/460/510 mm |
| Backrest height | 470, 545–670 mm (by 25 mm) |
| Distance between armrests | 380–480/480–580 mm |
| Armrest height | 185–320 mm |

| | |
|------------------------------------|------------------|
| Range | 25–30 km* |
| Max. speed | 8/10 km/h |
| Turning radius (ISO 7176-5) | 675 mm |
| Turning in corridor | 1040 mm |
| Obstacle capability | 60/75 mm |
| Suspension | Yes |
| Electronics R-net | 120 A |
| Electric seat elevator | 0–300 mm |
| Electric tilt adjustment posterior | 50° |
| Electric tilt adjustment anterior | 5°/10°/20°/30°** |
| Electric legrest adjustment | 90–180° |
| Electric backrest adjustment | 85°–150°/180°*** |
| Manual backrest adjustment | 120° |
| Crash tested ISO 7176-19 lock | Yes, max 136 kg |
| Crash tested ISO 10542-3 straps | Yes, max 150 kg |
| EN12182/EN12184 CE | Yes |

*The range may be reduced if the wheelchair is used frequently on slopes, rough ground or to climb kerbs often.

**At 20° and 30° special legrest is required.

***Depending on the height of the backrest.
