Pride Mobility[®] is one of the largest manufacturers within the industry, who are renowned for setting the bench mark for innovative and functional mobility products.

Pride is dedicated to providing expertly designed, engineered and tested products incorporating technologically innovative features. This enables our authorised dealers to provide the perfect mobility solution to suit your needs.

Types of Pride® products

Foldable power chair

1 Piece fold system | Lithium batteries | Light Weight

Products illustrated by this symbol:

Advanced 4mph, compact, portable and transportable, capable of folding in one simple movement. An option to remove parts like batteries makes it easier to transport or store due to compact the lightweight frame design.

Transportable boot scooter

Light Weight | Portable | Disassembles

Scooters illustrated by this symbol:

Small light travel scooters, which are easy to dismantle and can go at 4mph. These products can fit easily into most cars. Travel scooters are a lighter product meaning that there is a limit to weight capacity and battery size.

Types of Pride® products (continued)

Mid-Range scooter

Suspension | Larger Batteries | LED Lights

Scooters illustrated by this symbol:

A sturdier type of scooter, which is capable of transporting a higher weight capacity than lighter scooters and can travel at speeds of up to 4 mph. Some of our class 2 scooters can be dismantled, but they are heavier than L2 products.

8Mph Scooter

High Weight Capacity | Suspension | LED Lights

Scooters illustrated by this symbol:

A much heavier type of scooter, which is capable of carrying between 20 and 35 st 10 lbs (up to a maximum of 39st 3lbs) in passenger weight. This scooter can also travel at speeds of 8mph on road (4 mph on pavements) and must be registered by the DVLA.

Apex Lite

Modern, lightweight and agile
