

RENSAIR

Hospital-grade
air purification
made portable

rensair.com

— INTRODUCTION

RENSAIR

Clean air for every space

Clean air has never been more important. We have made hospital-grade air purifiers available globally.

The Rensair air purification technology was originally developed for Scandinavian hospitals, meeting strict air quality requirements.

It is a patented solution that uses the most advanced purification technology and the efficacy is documented by independent laboratories.

rensair.com

— DON'T JUST TRAP, DESTROY

Rensair destroys more than 99.97% of airborne bacteria and viruses

The Rensair air purifier consists of a germicidal ozone free UVC lamp placed in the centre of a cylindrical high quality HEPA 13 filter, to not only capture but also inactivate viruses and bacteria trapped on the filter surface.

The constant UVC illumination of the entire filtration area ensures a continuous disinfection process, resulting in a safer product to operate and maintain.

The effectiveness of the Rensair air purifier is documented by independent laboratories including **Eurofins**, **Norconsult** and **Oslo University Hospital**.

— WHY IS RENSAIR AN EFFECTIVE SOLUTION?

RENSAIR

**HOSPITAL-GRADE
TECHNOLOGY**

HEPA13 filter and
ozone free UVC light

**TESTED BY
INDEPENDENT
LABORATORIES**

Documented
effectiveness

**PATENTED
SOLUTION**

Unique system delivers
industry-leading
effectiveness

EASY TO USE

No installation
required, simply
plug it in

**LARGE CLEANING
CAPACITY**

Cleans 560m³/hour
(20,000ft³/hour)

**LOW & SAFE
MAINTENANCE**

9,000h (~1 year)
continuous run time

— HOW IT WORKS

PRE-FILTER

FAN

UVC LAMP

HEPA 13 FILTER

RENSAIR

The Rensair air purifier sucks in surrounding air through the upper air inlet perforations. Air travels through the removable pre-filters placed at the top of the machine which catch and trap larger airborne particles and dust.

A powerful fan pushes the pre-filtered air down into the cylindrical shaped HEPA 13 filter located in the middle of the unit.

As air hits the HEPA 13 filter, bacteria, viruses and smaller airborne particles and pollutants become trapped on its inner surface.

An 18W UVC lamp placed in the centre of the cylindrical drum continuously illuminates the entire filtration area. This UVC light breaks down the DNA and RNA of all pathogens thereby destroying them. The continuous disinfection process ensures that the Rensair air purifier is always safe to operate and maintain.

Large volumes of clean air travels out of the unit via the lower perforations. The cylindrical shape of the Rensair air purifier allows air to flow out in every direction thereby making it suitable for almost all locations.

— WHAT OUR CUSTOMERS SAY

Dentists

“The transportable and easy to install aspect of Rensair was appealing.”

Dr Taylor Orchard Cottage Dental Surgery

Gyms & Workout Studios

“We needed a technology that could purify the air, could capture and kill viruses, and was potent enough to exchange the litres of air we needed for a class.”

Gerry Lopez, Founder of Sadhana Yoga & Wellbeing

Cinemas & Theatres

“Rensair showed me hard clinical background and laboratory tests that proved they were actually killing viruses.”

Greg Lynn Manager of Prince Charles Cinema

Salons

“When I read about the Rensair portable air purifier system I knew that it would be a major benefit to my staff and customers’ safety.”

Chris Ward Founder of Huckle the Barber

Hotels & Restaurants

“Using Rensair shows the guests, on top of all the other measures, that their health and safety is our top priority,”

François Zissel Assistant General Manager of the Hotel Ibis

Retail

“I wanted to invest in something that I can use forever rather than just a temporary measure”

Saro Brindley founder of Eye Like Gallery

— SPECIFICATIONS

Dimensions: H:77cm / 30.3in, Ø37cm / 14.5in

Dimensions in box: H: 84cm / 33in x W: 43cm / 16.9in x D: 43cm / 16.9in

Net weight: 18kg / 40lbs

Gross Weight (including box): 21kg / 46lbs

Colour: White

HEPA filter: EU13 (EN 1822 class H13)

CE Certified (UK & EU): 220-240V,v ~50Hz, IEC C14 to C13 connector to allow for different power plugs
ETL Certified (US & Canada): 110-120V, ~60Hz, US type B power plug

Length of power cord: 3m / 9.8ft

UVC lamp: 18W, 254nm light

— MAINTENANCE

The Rensair air purifier will run for 9000 hours (~1 year) before you need to replace the HEPA 13 filter and UVC lamp. The Rensair air purifier will automatically alert you when the parts need to be replaced via the 'service indicator' on the display panel. Changing the HEPA 13 filter and UVC lamp is easy and can be done in five minutes. Instructions on how to change the filter and lamp will be included in the box when you order your replacement parts.

Alternatively, visit rensair.com/maintenance to view our online guide to changing these parts.

— THE CREATION OF RENSAIR STARTED DECADES AGO

The Rensair air purifier was developed decades ago by Henrik Hendriksen, a Danish engineer and inventor. For five years he represented Norway at the indoor climate association EUROVENT, helping to set the industry standard for truly clean air. His life-long experience with ventilation technology, combined with a desire to help relieve his son's severe allergies, led to the development of the Rensair air purifier.

Today, Henrik's twin sons Frederik and Christian Hendriksen continue to manufacture and distribute this technology worldwide.

RENSAIR

“My work as an engineer has always involved clean air.” —
H. Hendriksen
