AVERO Motion Seat - and reclining bath tub

Appropriate for all stages of mobility ...

Designed by Uwe Spannagel™

Benefits for your residents and nursing staff ...

- Electrical height and reclining adjustment
- Shaped seat with hygienic opening
- Anti-scalding protection for tub inlet and hand shower
- Operation panel with all functions
- Optional cable remote control
- Basic frame is freely to underpass by transfer lifts
- Appropriate for all stages of mobility
- Easy and save self entry
- Offers a maximum space in the zone of back and shoulders
- Ergonomical foot zone for optimal support
- Stretched inside shape also suitable for larger residents
- Overflow up to 5 cm higher than competitive tubs = bathing water up to the chest
- Flat door area without edges = easy transfer
- Large pre-filling volume with 98 l = resident is immediately surrounded by warm water after tilting the tub into horizontal position
- Ergo-hand grips = optimal hold for the bathing person

Optional change of viewing direction for a full view into the room ...

The unique tub design of the AVERO Motion allows a change of the viewing direction, thus the resident can enjoy, while bathing or showering, a full view into the room without distracting operation panel.

The pure and soft contours of the tub remind at first sight of a modern, state-of-the-art private bath tub and integrate itself perfectly to the existing wellness- and bathing concept of the facility. The functions have been optimized in close cooperation with experts from the care and therapy sector and have been adapted to the experiences of the daily work. This provides a wonderful bathing experience for the patient as well as for the care staff with a maximum of safety and comfort.

AVERO Motion E Seat- and reclining bath tub

Operation by cable remote control ...

Designed by Uwe Spannagel™

Benefits for your residents and nursing staff ...

- Electrical height and reclining adjustment
- Shaped seat with hygienic opening
- Anti-scalding protection for tub inlet and hand shower
- Operation by cable remote control
- Basic frame is freely to underpass by transfer lifts
- Appropriate for all stages of mobility
- Easy and save self entry
- Offers a maximum space in the zone of back and shoulders
- Ergonomical foot zone for optimal support
- Stretched inside shape also suitable for larger residents
- Overflow up to 5 cm higher than competitive tubs = bathing water up to the chest
- Flat door area without edges = easy transfer
- Large pre-filling volume with 98 l = resident is immediately surrounded by warm water after tilting the tub into horizontal position

Enjoy bathing with all your senses ...

A full bath beneficially effects the body and soul. According to the latest studies of the dementia research especially sensoric impulses have a therapeutical effect on the demented resident. Therefore, all of our bath tubs are optionally available with air-spa-system, colored-light-therapy-system, music-sound-system as well as aroma-therapy-system.

INVITA Tilting bath tub

The ideal bathing and showering solution ...

Safe bathing and showering - ideal for smaller space concepts ...

The tub enhances the independence of the resident and preserves his dignity due to the possibility of self-entry into the tub. Safe entry is supported by handles mounted on both sides of the tub rim and the horizontal position of the foot area gives additional hold. Of course, patient lifts can also be used for transfer into the tub.

The INVITA requires very little space and is therefore especially suited for small space concepts. The tub further convinces through extremely low water consumption. The tub can be filled within a very short time. The process is devised so as to allow for exceptionally fast emptying. This facilitates the bathing process additionally. A built-in thermostat provides protection against scalding from the tub spout and the hand shower and thus guarantees full safety.

AVERO Comfort Lifting bath tub

Combines wellness and care ...

Designed by Uwe Spannagel™

Design bath tub with domestic appeal ...

The modern, elegant and timeless tub shape of the AVERO Comfort fits unobtrusively in your new nursing bathroom and gives your residents, your staff and visitors at the same time the impression of a domestic surrounding.

Without floor fixation, due to its extraordinary stability, the tub stands solidly in the room and can be adjusted to the room conditions in an optimal way. Owing to the unique possibility to change a viewing direction a resident can enjoy a free view into a room.

Modern design for your nursing bathroom ...

AVERO Phoenix Lifting bath tub

Exclusive design and premium materials ...

Designed by Uwe Spannagel™

Tub body with lowered foot area ...

The AVERO Phoenix tub is freely accessible from underneath on three sides so that it can be easily used with bath lifts even in restricted spaces in very narrow rooms. The tub stands firmly on the floor with no fixation and can be optimally adjusted to your nursing bathroom. The tub body and foot area of the AVERO Phoenix tub allow for the use of all modern bath lifts and hoists available in the market.

The **lowered leg area** and the **specially adjusted back profile** of the tub body, with distinctive arm supports, form a balanced ergonomic inner shape of the tub which allows the resident to lie down in the tub in a relaxed and ergonomic manner. This proves to be of great advantage especially when using a seat lift, as it provides additional support to the resident inside the tub. The seating position is also equipped with a hygienic opening section which facilitates easy access for intimate cleaning.

Safety and comfort while bathing ...

The operating and control unit of the AVERO Phoenix lifting tub impresses with a distinctive elaborate shape and icons which eliminates the risk of faulty operation and facilitates work for staff. Special safety systems for the tub spout and hand shower protect the resident from scalding and inadvertent activation of the disinfection facility as long as the resident is lying in the tub.

High-quality chrome-plated grab handles in an unique design and additional slots integrated in the tub rim for the tub shortener give the tub not only a distinctive look but also excellent support and a feeling of safety to the resident who can enjoy the bath in complete relaxation.

AVERO Premium plus Lifting bath tub

Safety and comfort while bathing ...

Benefits for residents and care staff ...

- Tub body with lowered foot area
- Simple operation via a keypad with icons
- Safety modules prevent faulty operation
- Non-porous surface for simple cleaning and optimum hygiene
- Works in an ergonomic manner, height adjustment of the tub to the working height required
- Ergonomic tub interior body allows comfortable and safe bathing of the resident with or without hoist
- Armrests with handles for more comfort and safety
- Shaped seat with care opening for better hygiene in the intimate area
- Scald protection for hand shower and bath tap
- More than sufficient space for the resident's shoulders
- Suitable for all standard lifts

AVERO Classic Lifting bath tub

The classic, elegant nursing tub ...

Ergonomic interior tub body in body shape ...

An attractive design with maximum functionality distinguishes the AVERO Classic nursing tub. New concepts within nursing homes have increased demand for more attractive and modern bath tub shapes, particularly in the central bathroom. An ergonomic bath tub, which emulates the body shape of the patient, offers extra space around the shoulder area and decreases in size at the foot area, providing a bath tub which is not only functional but also comfortable.

Arm supports with premium grab handles, which are positioned below the bath rim and between the foot and head end of the bath, provide the resident with increased comfort and additional safety during bathing. A thermostatic mixer, mounted onto the tub rim, maintains the desired temperature which increases bathing safety of the bath in a domestic environment.

Benefits for residents and care staff ...

- Easy operation by symbols
- Stepless height adjustment for optimal working height
- Pore-free surface for easy disinfection and optimal hygiene
- Unrestricted access for all hoists
- Ergonomical interior tub body
- Arm rests with grips for more comfort and safety
- Domestic appearance
- Scalding protection for hand shower and tub spout

AVERO Comfort Nursing bath tub

Modern design for your nursing bathroom ...

Designed by Uwe Spannagel™

Safety and comfort while bathing ...

The nursing tub AVERO Comfort provides unrestricted access for all hoists. Therefore, even in small rooms and narrow spaces one can use bathing lifts without any problems. The care tub is available in two different working heights and offers a possibility of changing a viewing direction allowing resident a free view into the room.

The care tub is applicable for all nursing lifts on the market. Use the optional possibility to fill the tub with an automatic tub filling stop to attend to the resident during the filling of the tub. Premium, chromed brass grips with a distinctive design and additional, embedded in the tub rim insertions for a tub shortener, give the tub not only a distinctive look, but also an excellent holding point for the resident.

SENTA PUR L Combi bathing lift

The innovative solution for bathing and showering ...

Fits in every care tub ...

The SENTA PUR L showering and bathing lift is exactly the right tool to be able to shower or bath the person needing help safely and comfortably at any time, regardless of the level of mobility of your resident. The SENTA PUR L lift is extremely easy to manoeuvre and can be applied in any type of care tub in a flexible manner.

Height adjustment is stepless via a battery-operated electric drive and therefore not distressing for the resident. The lift is operated easily and safely via a corresponding hand-held remote control and can be handled by a single staff.

Each lift is equipped with standard protection devices against overload and against collision. An integrated service module reports disturbances and maintenance due to the lifter. An integrated manual emergency lowering device is, of course, included.

Easily convertible into a stretcher lift ...

The SENTA PUR L bathing lift can be easily and quickly converted into a fully adequate stretcher lift by means of optional stretcher lift modules. By default, each seat is prepared in such a way that one single staff is able to plug in the side wings without effort. This provides you with the necessary flexibility that is required without having to resort to a second lift. The seating area has a large care opening which can be closed with a cover if required.

Flexibly applicable - also for transfer from the bed. Depending on your care routine, you can also pick up your resident from the bed with our showering and bathing lift directly. The deep carrier frame allows to be passed underneath the care bed for easy transfer from the bed. Your resident can, of course, also sit down on the seat by himself. The carrier frame is formed in a way that this is possible without hindering the legs and heels.

SINA Comfort Shower trolley

The optimal solution for safe and comfortable showering ...

Electrical or hydraulic height adjustment ...

Provides highest quality and comfort ...

The SINA shower trolley offers the ideal way of giving the resident a safe, comfortable and dignified shower. The transfer from bed to shower trolley takes place by moving it sideways to the bed and using a transfer aid to move onto the shower trolley. The comfortable padded shower mattress offers a pleasant surface where the resident lies safely and easily. The high siderails provide protection against rolling off from the shower trolley.

The maintenance-free metal siderail hinges have been designed to withstand extreme weight and offer dependable safety for the residents and the staff. Electrical or hydraulic height adjustment options allow the trolley to be adjusted to an ideal working height and thus provide for a stress-free shower.

Shower consoles

The ideal complement to our showering care systems ...

Comfortable and safe showering ...

The BEKA Hospitec shower consoles offer an ideal complement to mobile shower systems like the shower trolleys or shower and nursing chairs offered by BEKA Hospitec. An integrated thermostatic mixer allows the showering temperature to be set safely and reliably. The extra long shower hose gives a very large working range, which is especially helpful when using it with our SINA shower trolley, allowing the nurse to shower the resident all over. An optional integrated disinfection system is used to disinfect the bathing and showering lifts or other showering systems to prevent cross contamination. You can use your in-house, approved concentrated disinfection fluid. A flowmeter control allows adjustment of the fluid concentration. The shower console is available in different versions, e.g. including an integrated toilet.

Benefits for residents and care staff ...

- ❑ Combined shower and disinfection solution
- ❑ Wide range of applications including a toileting solution
- ❑ Easy cleaning
- ❑ High safety through anti-scalding protection
- ❑ Provides for comfortable personal hygiene
- ❑ Stable, sturdy construction
- ❑ Easy installation
- ❑ Power supply is not necessary
- ❑ Can be used with every standard toilet
- ❑ Extra long shower hose
- ❑ Integrated thermostatic mixer
- ❑ Pore-free surface meets the highest hygienic standards

NORA Aluminium Stand-up/raising aid

Special adaption for shorter residents ...

Special adaptation for shorter residents ...

Additional sling attachment points for persons of up to 1.60 m of height

With other active lifters, shorter residents with a body height of up to 1.60 m have the problem of not being able to stand upright. Getting into an upright position with these lifters can be unpleasant and painful for shorter residents. Our NORA Aluminium therefore offers two additional mounting pins to attach the slings to enable shorter residents to stand safely and comfortably without putting strain on their back and shoulders.

Flexible, double knee pads adjustable to multiple heights

Our ergonomically formed, flexible double knee pads are stored individually, and the height can additionally be adjusted for optimum adaptation when used by shorter residents. Due to such option for individual adaptation to the body height, there is no painful pressure on the kneecap of your residents while standing.

Benefits for residents and care staff ...

- ❑ The perfect tool for mobility and transfer
- ❑ Lightweight construction with aluminium components, very easy to manoeuvre
- ❑ Additional sling attachment points specially for lifting shorter residents up to 1.60m of body height
- ❑ Flexible, height-adjustable knee pads with safety slings, specially adjustable for shorter residents
- ❑ Electrically spreadable carrier frame
- ❑ No strain/damage to the spine of the nurse while transferring
- ❑ Can also be used for showering the seat area
- ❑ Handling possible by a single nurse
- ❑ High flexibility due to a new sling and ergonomic concept while lifting
- ❑ Wide lifting range with emergency lowering function
- ❑ Secured castors and ergonomic handles

NORA Classic Stand-up/raising-aid

Effective support in day-to-day care

Ideal for use in small rooms ...

The NORA Classic has been designed specifically for use in small rooms, such as bathrooms, where space can often be limited or restricted. The electrically operated spreadable frame, with premium double castors, allows easy movement in the smallest of spaces while the positioning of the footplate and feet at the center of the frame permits easy transfer from a wheelchair while keeping the footprint of the lift to a minimum.

Safety and comfort

The flexible, separately attached leg supports with integrated shock absorbers enable comfortable positioning of each leg individually whilst minimising pressure during the lift. The sling with chest strap and side-positioned handles provide a safe and comfortable lifting experience, both for the patient and for nursing staff.

Benefits for residents and care staff ...

- ❑ The ideal aid to motility
- ❑ Easy handling
- ❑ Electrically spreadable chassis
- ❑ Very high lifting range for raising the resident up to fully vertical stress of the legs
- ❑ No spinal stress or back strain during transfer
- ❑ Can be operated by a single nurse
- ❑ High flexibility and ergonomic lifting with new sling and chest strap
- ❑ Ergonomical handles for an optimal holding position
- ❑ Manual emergency lowering system
- ❑ Extra soft knee-pads with safety belts, for maximum comfort and safety
- ❑ Cable remote control with display of the charging condition of the battery
- ❑ Easy movable by double castors

Sling hoist CARLO Comfort Alu EP

The versatile patient lift for all areas of care ...

Electrical positioning system (EPS) ...

The electrical positioning system allows the nurse to position the resident accurately and without effort and at the same time stay in direct contact with them. She can give full attention to the resident to convey an additional sense of safety, while maintaining an ergonomical working position. The hand operated electrical control means the resident can be effortlessly moved from a sitting into a lying position in the bed or positioned above the toilet. The use of four-point-slings with safety clip system means the usual swinging movements found with other hoists can be reduced to a minimum.

The CARLO Comfort Alu EP is characterized by a wide lifting range and allows both a very high and a very low position. The lifting arm with 4-point hanger bar can be lowered to the floor by

the hand control thereby guaranteeing safe and uncomplicated raising of a collapsed person on the floor, for example. The chassis can be spread and closed electrically making it easy to reach the toilet comfortably. The low height of the chassis on the CARLO Comfort Alu EP means it will fit under bathing tubs as well as nursing beds without trouble.

The CARLO Comfort Alu EP mobile, passive sling lift reliably supports the nursing staff during their daily lifting and transfer routine. It allows ergonomical, safe and efficient work at all times, and avoids the stress that manual lifting and repositioning of the resident puts on the carer's musculoskeletal system. With the electrical positioning system (EPS) and the light aluminium construction of the lift, the work flow becomes not only healthier, but also easier and more comfortable.

Benefits for residents and care staff ...

- ❑ Light construction due to aluminium parts (carrier frame, lifting column)
- ❑ Extra flexible and easy to move
- ❑ Applicable for showering and bathing
- ❑ Electrical positioning system (EPS)
- ❑ Electrical height adjustment with lowering of the hanger bar to the floor
- ❑ Hanger bar with anti-rotation mechanism (ARM)
- ❑ Electrically spreadable carrier frame
- ❑ Offers extra large space between hanger bar and lifting column
- ❑ 360° rotation area of the hanger bar
- ❑ Hand control with display of charging condition of the battery
- ❑ Optional available with patient scale
- ❑ Battery and charging unit fit to all BEKA Hospitec hoists
- ❑ Large choice of comfort slings with safety clip in different sizes

Sling hoist CARLO Comfort Alu EP 230

The ideal solution for heavy residents ...

The ideal solution for residents up to 230 kg ...

The CARLO Comfort Alu EP 230 sling hoist has been specially made for lifting, moving and transferring heavy weighted patients until a maximum weight of each resident of 230 kg. Due to the special construction and the steel components the hoist is extra light and easy to move, but still offers the required stability for the care of heavy weighted residents.

The extra wide 4-point-hanger bar made from stainless steel is appropriate for all clip slings and offers sufficient space, also for heavy weighted residents.

It disposes of an **anti-rotation mechanism (ARM)**, whose patent has been requested, avoiding an involuntary rotation of the hanger bar, providing an additional feeling of safety during the transfer. In order to simplify the use and the movements the hanger bar has been equipped with an extra

large, free rotation area of 360°. Thanks to the extra large space between hanger bar and lifting column the resident can be positioned without any problem, and without touching legs or knees, into the desired care position.

With the **electrical positioning system (EPS)** of our sling hoist, the caregiver can place the resident in the sitting or lying position without any effort, exactly and without force, and can be at any time in direct contact with the resident. In this way he can focus entirely on the resident, providing an additional feeling of safety and maintaining at the same time an ergonomic working position. The resident can be turned without any problem from a sitting into a lying position and vice versa, and can be placed in an optimal way in bed or on the toilet. Especially in the lying position the resident will experience a clear pressure release in the legs.

Benefits residents and care staff ...

- ❑ Light device thanks to an aluminium/steel construction
- ❑ Extra light and easy to move
- ❑ Universal use, also appropriate for bathing
- ❑ Electrical positioning system (EPS) in order to place the resident exactly without additional force
- ❑ Electrical height adjustment and electrically spreadable chassis
- ❑ Hanger bar with anti-rotation mechanism (ARM)
- ❑ Extra space within the hanger bar
- ❑ Hanger bar with large, free rotation area of 360°
- ❑ Cable remote control with indication of the status of the battery
- ❑ Ergonomic and health protecting work, since manual lifting is not required
- ❑ Battery and charging unit are appropriate for all BEKA Hospitec hoists
- ❑ Wide choice of comfort slings with clip in different sizes
- ❑ Optionally available with a calibrated patient scale

CARLO Classic Alu Sling hoist

Offers maximum safety and comfort ...

The ideal relief in daily care ...

The CARLO Classic Aluminium is characterised by an extremely light but nonetheless very stable aluminium construction and offers maximum safety and comfort to your residents and your nursing staff.

The lifting arm with a 4-point sling bow can be lowered to the floor by means of a hand control which ensures that a person who has fallen to the floor can be safely and easily lifted by just one staff. The carrier frame can be spread electrically and is thus very comfortable to operate. Due to the low height of the carrier frame, the CARLO Classic Alu can easily pass underneath both bathtubs and care beds.

The stable sling bow is suitable for all loop slings, is provided with a safety locking mechanism to attach the slings and is characterised by a patent-pending adjustment option to reduce rotation.

Our mobile Carlo Classic Aluminium sling hoist supports your nursing staff in their everyday lifting and transfer routines in an optimal and reliable manner and allows for ergonomically safe and efficient work at all times, without putting any strain on the musculoskeletal system when lifting and repositioning the resident manually.

Benefits residents and care staff ...

- ❑ Light construction, as the carrier frame and the lifting column are made of 100% aluminium
- ❑ Extra light and easy to manoeuvre
- ❑ High-quality lockable STEINCO double castors
- ❑ Electrical height adjustment and electrically spreadable carrier frame
- ❑ No unsettling pendular or rotational movements during lifting and transferring, with patent-pending adjustment option to reduce rotation
- ❑ Hand control with display of the battery charge status
- ❑ Working in an ergonomic and health-orientated manner, as no manual lifting is required
- ❑ 4-point hanger bar with safety locking mechanism
- ❑ Battery and charger compatible with all BEKA Hospitec hoists
- ❑ Large choice of comfortable loops slings of different sizes
- ❑ Also available with patient scale

CARLO Classic Alu HD 230 Sling hoist

Offers maximum safety and comfort ...

The ideal solution for residents up to 230 kg ...

The CARLO Classic HD Aluminium patient hoist has been developed specifically for lifting, repositioning and transferring residents who are limited in their mobility and have a maximum patient weight of up to 230 kg.

Due to the special construction made of aluminium and steel components, the hoist is very easy to manoeuvre but nonetheless provides the stability required for the care of heavyweight residents. The extra wide sling bow made of stainless steel is suitable for all loop slings; it is provided with a safety locking mechanism to attach the slings and is characterised by a patent-pending adjustment option to reduce rotation.

Along with a huge lifting range, the CARLO Classic HD Aluminium also convinces through its large and free range of rotation. This allows for the resident to be easily brought into the desired nursing position, without him hitting his legs or knees.

Benefits residents and care staff ...

- ❑ Light but nonetheless stable construction made of aluminium/steel
- ❑ Extra light and easy to manoeuvre
- ❑ High-quality lockable STEINCO double castors
- ❑ Electrical height adjustment and electrically spreadable carrier frame
- ❑ No unsettling pendular or rotational movements during lifting and transferring, with patent-pending adjustment option to reduce rotation
- ❑ Hand control with display of battery charge status
- ❑ Working in an ergonomic and health-orientated manner, as no manual lifting is required
- ❑ Large and free rotating area for the resident
- ❑ 4-point hanger bar made of stainless steel, suitable for all loop slings
- ❑ Battery and charger compatible with all BEKA Hospitec hoists
- ❑ Also available with patient scale

ANA Nursing- and care table

For wall mounting ...

beka
hospitec

Benefits ANA Nursing- and care table ...

- ❑ Wall mounting
- ❑ Electrical height adjustment
- ❑ Comfort, soft and solid lying area
- ❑ Continuous height adjustment for ideal working height
- ❑ Direct wheelchair-height transfer possible
- ❑ Excellent protection against unintended rolling off
- ❑ Soft but sturdy synthetic-leather surface
- ❑ Easy to operate and compatible with all devices
- ❑ Optionally be fitted with foldable rails

MONA Nursing- and care table

Mobile and easy to move...

The ideal solution for demanding care ...

A large well-padded lying area, adapted to their needs and requirements, is the basis for the safe and comfortable care of a disabled person. The rounded edges are padded and make sure that even very sensitive skin is not injured. The sturdy scissor-action height adjustment offers a rigid, stable base for professional care. Our system makes sure that neither the padded surface nor the table itself rocks or sways. This offers safety and trust in our high-quality product, even for very anxious patients. An adjustable head-rest is available as an option to further increase user comfort. The MONA nursing and care table can optionally be fitted with foldable rails on each side. This offers additional safety. Transfer onto the Mona can take place either with a mobile patient lift, whose legs can easily pass under the table frame, or straight from a wheelchair onto the MONA nursing and care table, which can be lowered right down to the height of the wheelchair.

Benefits MONA Nursing- and care table ...

- ❑ Mobile and easy to move
- ❑ Comfort, soft and solid lying area
- ❑ Continuous height adjustment for ideal working height
- ❑ Direct wheelchair-height transfer possible
- ❑ Excellent protection against unintended rolling off
- ❑ Different widths and lengths available
- ❑ Soft but sturdy synthetic-leather surface
- ❑ Easy to operate and compatible with all devices
- ❑ Optionally be fitted with foldable rails on each side

BEKA Hospitec GmbH

About us ...

Since 1967 BEKA Hospitec has been developing and producing care and treatment systems for rehabilitation and care at the location Dutenhofen close to Wetzlar. Founded as Bernd Kraft Medical Apparatus production company it focused on devices for hydrotherapy and treatment tables for hospitals and rehabilitation centres. In the 1980s the product range was expanded by nursing and care bath tubs and lifting systems. In 1998 a traditional German company Hospitec was integrated and thus the current company's name, BEKA Hospitec, was created.

Today, BEKA Hospitec is one of the most innovative companies on the market and exports worldwide. Know-how of BEKA Hospitec covers the furnishing of nursing home, hospitals, facilities for disabled people with the appropriate care and treatment systems as well as the planning and furnishing of complete rehabilitation and therapy facilities.

BEKA Hospitec develops and produces innovative premium care and treatment systems in Germany providing its customers with the products of highest quality and reliability "Made in Germany".
